

Saturday Morning Racing

[Campaign Preview](#) [HTML Source](#) [Plain-Text Email](#) [Details](#)

Wednesday night racing is going to Saturday. Castle Harbor will allow us to start using the race committee that is already there for the Harbor 20's. Once per month will be Keel boats and Once per month will be Flying Scots and other one design boats. Scots are welcome any Saturday but the idea is to shoot for larger participation once per month. The fee will be \$20.00 per boat per day. The format will be similar to that of Wednesday nights with focus on training, practice and fleet building-- not scoring. We will be provided a start but no finishes will be recorded. If individual fleets want to keep score and provide volunteers to do it, no problem. But I would prefer it be low key and focused on bringing in new people and training rather than have the pressure of winning a race. We are planning to have videos after the race with commentary by Gary and whoever else can provide constructive comments.

Here are the proposed dates

November	17 one design	24 Keelboat
December	8 one design	29 keelboat
January	5 one design	25 keelboat
February	2 one design	9 keelboat
March	9 one design	2 keelboat
April	13 one design	
May	13 one design	25 keelboat
June	15 one design	22 keelboat
July	13 one design	20 keelboat
August	10 one design	17 keelboat

We will meet on the water in the vicinity of quick flash and sail in a 1.5 mile circle that reaches from there east to Key Biscayne. The start will be on the down wind side of the circle. We are working on a way the you can have a card on file with us and simply check in to have the card charged. There is no commitment other than to show up and race. The Scots will still leave from Coconut Grove Sailing Club and the rest of the boats will come from whatever yacht club they sail from.

Please contact me with any questions and comments. I am open to ideas on how to expand or improve it but want to keep it very simple. Also please pass the word to other skippers in your fleet so we can build participation. If you have them email me at my email bud5220@gmail.com and request to be put on my email list they will get updates and revisions as they come out.

Thanks.

Bud
